CLINICIAN
CONSULTATION
CENTER

National rapid response for HIV management
and bloodborne pathogen exposures.

“Supporting clinicians – whether in primary care, specialty care, or emergency care – is incredibly rewarding work.”

*–Ron Goldschmidt, MD,
founder and director*

The Clinician Consultation Center, a component of the AIDS Education and Training Centers, is funded by the Health Resources and Services Administration in partnership with the Centers for Disease Control and Prevention. The Center is located at UCSF at San Francisco General Hospital.

The Clinician Consultation Center provides prompt and expert advice to clinicians of all experience levels on managing HIV/AIDS, perinatal HIV, and bloodborne pathogen exposures. Together, we improve patient health outcomes by building the capacity of healthcare providers.

The Center’s consulting physicians, nurses, and clinical pharmacists have provided more than 200,000 expert consultations since our inception. Our services are free to healthcare providers and available online or by phone.
